

Note on Board Policy CQ-L

In the spring of 2003 the following changes are being recommended for Board approval:

INTERNET SAFETY

The Superintendent or designee shall develop and implement an Internet safety plan to:

1. Control students' access to inappropriate materials, as well as to materials that are harmful to minors;
2. Ensure student safety and security when using electronic communications;
3. Prevent unauthorized access, including hacking and other unlawful activities; and
4. Restrict unauthorized disclosure, use, and dissemination of personally identifiable information regarding students.

FILTERING

Each District computer with Internet access shall have a filtering device or software that blocks access to visual depictions that are obscene, pornographic, inappropriate for students, or harmful to minors, as defined by the federal Children's Internet Protection act and as determined by the Superintendent or designee.

The Superintendent or designee shall enforce the use of such filtering devices. Upon approval from the Superintendent or designee, an administrator, supervisor, or other authorized person may disable the filtering device for bona fide research or other lawful purpose.

MONITORED USE

Electronic mail transmissions and other use of the electronic communications system by students and employees shall not be considered private. Designated District staff shall be authorized to monitor such communication at any time to ensure appropriate use.
