The link below will install what is needed for the Interactive PEN to work within Activinspire

* Notice there are separate ones distinguished between DELL or MAC users

<http://www.boxlight.com/ProjectoWrite5-Software>

The light pen dual and touch mouse will be for windows

Lightpen3 and mouse driver Mac is for the Mac book airs

Activinspire

Below is the link and instructions to install Activinspire onto your laptop...This is mainly for NEW teachers to this campus.

The best way is to download ActivInspire directly from the support page at PrometheanPlanet.com. I tried to create you a free account, which you will need in order to download from their site, but it shows your email already in use. I'm hoping that means you have already created an account. If you click the link below, it will take you directly to the download page after you sign in.

<http://support.prometheanplanet.com/server.php?show=nav.297>

[51&changeCountry=United+States](#)

Then locate the version of ActivInspire you need. Windows (Dell) or Mac.

Once the download is complete, you'll need to install the application according to the steps in the install wizard.

After installation is complete, it may ask you for an Activation code, key or serial #. If so, just copy and paste this number into the field. 0015-4097-6376-2378-1374

You can also download both windows and Mac versions of ActivInspire to a flash drive or a local shared drive so you will always have it and that way you won't need to log into PrometheanPlanet each time you need to install it. Any issues please contact Mrs. Green or myself

iPevo iZiggi download
