How to Print from Your New Device on the Mac OS Side.
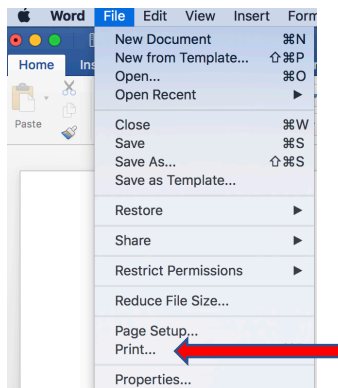

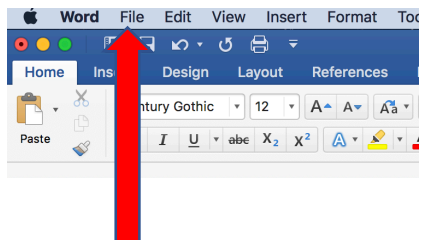

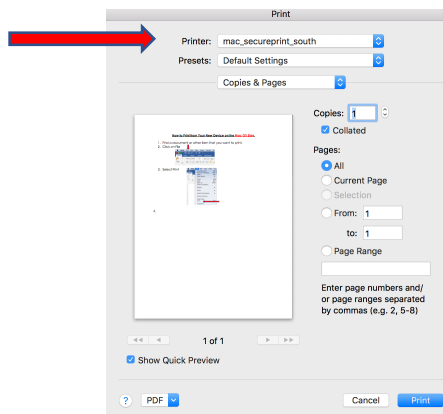

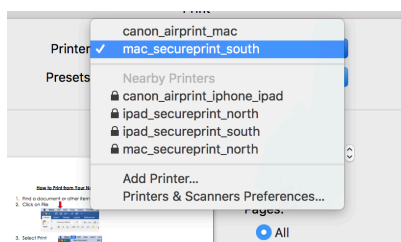

1. Find a document or other item that you want to print.
2. Click on File, and select Print.

3. This box will open. Click the drop down to select your printer.

4. You will see a list of printers like this.

5. If your campus is **North** of Pioneer Pkwy., select **mac_secureprint_north** and if your campus is **South** of Pioneer Pkwy., select **mac_secureprint_south**

6. Once you have selected the correct printer, you have all of the options to select the number of copies, layout, staple, and even hole punch by clicking the drop down here.

7. Select "Finishing Options" for stapling and hole punch.

8. Now click "Print." You will still need to log into the printer to release your job.
